

# Babraham Research Campus

*a place to embrace opportunity*

## The Technology Development Laboratory (TDL)

The TDL is designed to **develop ideas** and technologies into **viable** commercial propositions in a way which reduces **cash-burn**

The TDL can provide the following services on a bespoke basis:

- Enzymatic assay development
- Small molecular inhibitor screening service
- Molecular biology services
- Bacterial and mammalian cell culture
- Wave culture system for 10 – 25L mammalian cell culture
- Protein purification using an AktaPurifier chromatographic system
- Tissue culture services
- Monoclonal antibody service and antibody purification service

Equipment available for rent:

- Biacore T200
- Biorad CFX96 real-time PCR machine
