

## **R&D Laboratory Assistant**

We are seeking an R&D laboratory assistant to carry out routine laboratory work to support the development of in vitro diagnostic assays using the RPA technology and to perform testing on developed chemical reactions. We are looking for someone with a molecular biology or genetics background to work within a small team in our R&D department.

The successful candidate will have responsibility for assigned laboratory tasks and associated documentation. You may have experience working on development activities within an R&D department under supervision or be a new graduate in a biological science discipline who demonstrates enthusiasm, energy and a willingness to learn.

The role will include completion of documentation in accordance with the company's quality management system, the undertaking of general housekeeping duties associated with all areas of the facility, the performance of routine equipment maintenance and calibration, completion of data analysis, making suggestions and participating in process improvement to ensure continuous improvement in quality and efficiency within R&D activities.

If you would like to apply please send your CV and a letter of application to [janet@twistdx.co.uk](mailto:janet@twistdx.co.uk). Please quote BBRDLA05052017
